The Next Evolution | Quality with Versatility

FUJIFILM

FUJI XEROX

The Next Evolution

The New ApeosPort devices from FUJIFILM Business Innovation are designed to accelerate your business evolution, removing technological barriers to add greater flexibility to your work environment.

ApeosPort C7070 / C6570 / C5570 / C4570 / C3570 / C3070 comes with a strong pack of high quality features - From best of the class image resolution, to having a heavily built strong chassis minimizing the vibrations during peak loads.

Accompanied with highest quality standards, ApeosPort C7070 / C6570 / C5570 / C4570 / C3570 / C3070 are truly dynamic in nature. With its versatile feature set of top security certifications, predictive maintenance, automated workflows and multiple finishing options, these device slips right into your work environment.

360° data security

Secure data confidentiality, integrity and availability with strong device level encryption, document rights management and potential data backup creation.

ApeosPort

Mobile supported

Wireless LAN supported

*1: For C7070. 65 ppm for C6570, 55 ppm for C5570, 45 ppm for C4570, 35 ppm for C3570, 30 ppm for C3070.
*2: Ppm by single-pass duplex scanning using the Duplex Automatic Document Feeder C2-PC. 154 ppm when using the Duplex Automatic Document Feeder B1-PC.
*3: Dpi when the document type is set to photo. 600 x 600 dpi for texts, text/photos, and maps.

End to end automated workflow

The latest multifunction devices share the same intuitive user interface that you have come to know and understand on your smart devices for simple and immersive user experience.

Borderless workspace

As your business evolves, FUJIFILM Business Innovation solutions and services helps you with your transition smoothly and seamlessly.

360° data security

FUJIFILM Business Innovation proudly defines its holistic security approach on the basic principles of Confidentiality, Integrity and Availability.

The new ApeosPort series incorporates security features to combat the significant threats facing the entire information management life cycle; starting at device level with document creation, to setting access rights for document sharing both internally and externally, to creating potential backup plans for all scanned documents for business continuity planning.

ApeosPort is equipped with both user-friendliness and security measures

Comprehensive security measures protect your important information against threats such as unauthorised access, information leakage, and data tampering.

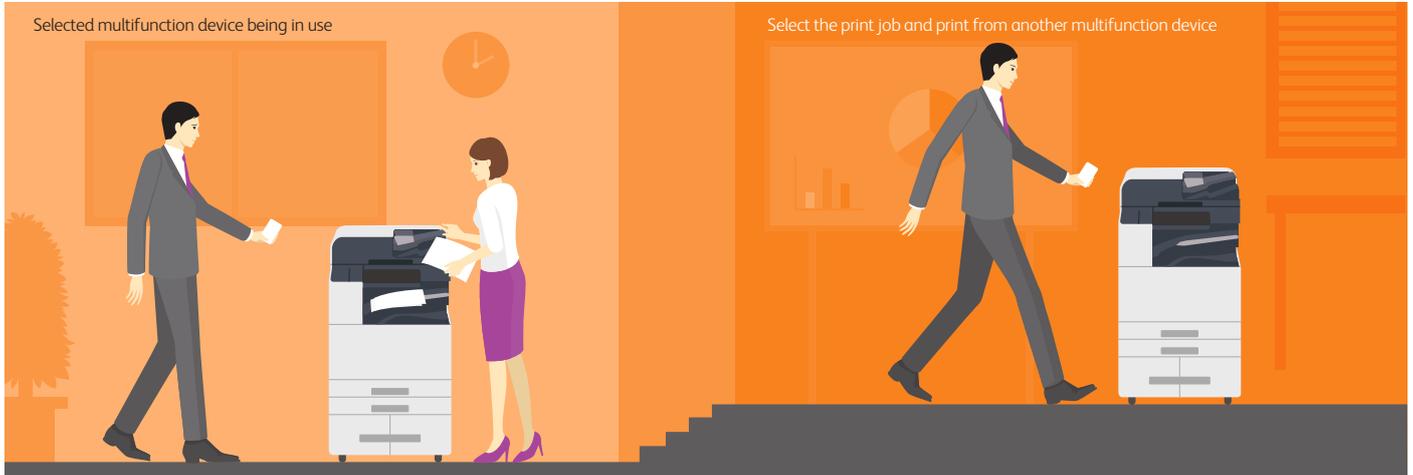

• Local authentication
• Remote authentication*1
• IC card authentication*1
• User-specific feature access
• Private charge print

User authentication and permissions

• Image Log*1
• UUID printing
• Audit Log
• Transfer audit log system

Logs and their protection

Protection of administration functions
• Customer engineer operation restrictions
• Account Lock against unauthorised access
• Default password warning

Safeguard Customer Information

• Signature verification of software
• Remote update restrictions
• IP address restriction
• Startup integrity check
• Running integrity protection

Protection of MFD software

Protection of communication and data
• Communication route encryption SSL/TLS, IPsec
• Encryption on scan transmission by SMBv3, SFTP
• Scan file encryption / signature
• E-mail signature and e-mail encryption (S/MIME)
• TLS version limit
• Elliptic curve cryptography
• Secondary Ethernet*1

• Warnings displayed when using global IP address
• Scanned documents to be delivered to fixed destination
• Destination reentry   • Forced annotations
• Hidden text printing*1
• Digital code embedding and tracking function*1

Prevention of setting / operation mistakes

Stored document protection in MFD

• Encrypting Data Stored on SSD
• Use TPM*2 chip for encryption key management
• Delete all data on the device

*1: Optional.
*2: Trusted Platform Module

4

Server-less authentication

Share user authentication information between multiple multifunction devices without requiring an authentication server. When you register user authentication information and associate it with the IC card ID information, this is stored in the parent ApeosPort device and shares it with linked devices. This makes it easy to use any linked device following authentication procedures, and reduces costs as you do not need a dedicated server.
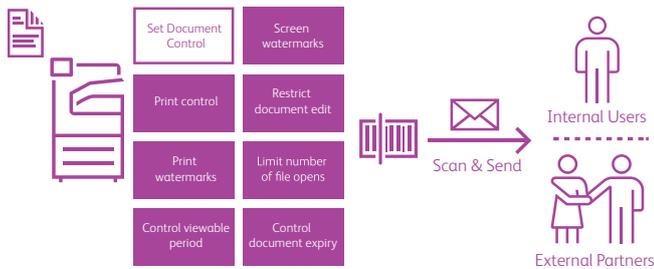

Note: Server-less authentication is an optional feature.
Note: Server-less authentication requires additional IC card reader.

Server-less on-demand printing

If the multifunction device that you set as the output destination is being used, you can redirect your print job to another multifunction device – saving you time, especially when you are in a hurry. Check the status of your print job on the UI panel before printing using the preview displays, or change settings such as the number of copies, colour mode and one-sided/two-sided output, all from the UI panel. This improves document security and reduces waste from unnecessary printing.

Note: Server-less on-demand printing is an optional feature.

Selected multifunction device being in use

Select the print job and print from another multifunction device

Document Rights Management

Smart Work Gateway uses data-centric security and Document Rights Management (DRM) to control the use of, modification and distribution of your content. With the use of DRM, your information has the highest security standards, reducing the risk of information leaks. If confidential information leaks do occur, you can respond swiftly - securing your data and identifying the source of the leak. When integrated with the FUJIFILM Business Innovation ApeosPort, paper documents scanned by the device are secured with the same process as digital documents.

Set Document Control · Screen watermarks · Print control · Restrict document edit · Print watermarks · Limit number of file opens · Control viewable period · Control document expiry · Scan & Send · Internal Users · External Partners

Image log of transmitted fax document

A simple image log of transmitted fax documents can be retrieved. The same document is automatically transferred to the SMB destination or e-mail destination specified in advance when a fax is sent. By enabling a transmitted fax document image log to be automatically retained, information can be managed, monitored, and tracked without the need to file paper documents. It also reduces the risk of information leaks.

Simple image log · Select auto forwarding destination · SMB · E-mail
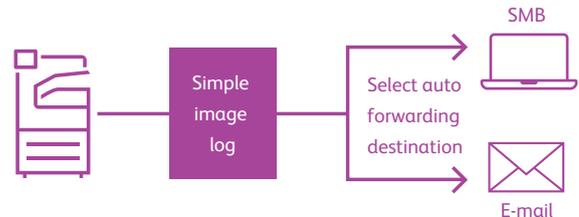

Secure paperless fax reception

The network that can be used for the device folder where paperless fax documents are saved can now be selected. This enables received fax documents can only be checked with separate networks when using two LANs with a secondary Ethernet or when using two fax lines with a second G3 port.

Save received fax documents to Folder 1

Folder 1 · Folder 2 · LAN1 · LAN2
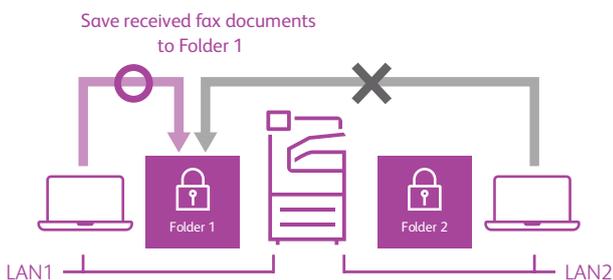

Authentication in Azure Active Directory

The ApeosPort devices can integrate with Microsoft Azure Active Directory, a cloud-based identity management service. Azure Active Directory can be used for authenticating to multifunction devices and FUJIFILM Business Innovation's cloud services.

Further enhanced security

- Importing a device certificate to a multifunction device, digital signatures and encrypted communication based on S/MIME can be performed when sending e-mail/Internet faxes.

- Attaching a digital signature to scanned documents detects modifications and sender falsification can be prevented.

Image log*

Image log enables job logs (including user, usage time, number of copies) and the image itself to be stored and managed, enabling prompt investigation should a confidential document be leaked.

*: Optional. Requires separately sold ApeosWare Image Log Management software.

End to end automated workflow

A more connected work is the key philosophy behind FUJIFILM Business Innovation's pursuit to re-define the user experience – and this is embodied in the new ApeosPort series.

Incorporating familiar gestures of tap, swipe and select, and customisation to suit your workflow, the redesigned touch panel is your gateway to a new dimension of operability, with simple distribution and archiving of digitalised documents

All new User Interface (UI)

Completely renewed UI panel design
The new UI panel can be operated with a tap and swipe just like a smartphone, adding an intuitive and familiar user experience to device operations. All operations can be completed using a single finger on the 10.1 inch colour touch panel. The improved menu navigation makes finding menu items easy, with fewer steps, improving overall operability.

Adjustable UI panel angle
A tilt mechanism has been adopted to enable angle adjustment, enabling the screen to be adjusted to avoid light reflections, or for the user to adjust its angle for an easier view.

Advanced operability
Colourful and user-friendly
Each function has been cleverly grouped by colour, allowing easy user recognition. Frequently used basic functions are displayed in the coloured area so they can be easily found and actioned.

Easy to f nd and locate
A hierarchy-free screen structure enables the various settings to be checked in a list. Detailed settings can also be specif ed via tap and swipe operations with a single f nger.

Support for multiple languages
The device supports multiple languages including Japanese, English, Chinese (simplif ed/traditional), Korean, Thai, and Vietnamese, and can be easily switched to accommodate different users. Selecting a destination becomes even easier. Destinations can be easily specif ed from the UI panel when sending.

Selecting a destination becomes even easier
Destinations can be easily specif ed from the UI panel when sending a fax, and when sending an email or storing data to your computer when scanning. With the uniform display, only the usable functions and destinations will be displayed according to what you have entered. Even if you are unaccustomed to operating this device, you should be able to specify your destination without worries.

Multifunction devices learn your habits

ApeosPort devices learn your habits -- your preferred features, settings, etc. You can also customise the operation screen displayed after authentication to your needs as well as the common operation screen.

Custom home screen and feature list

Move an icon just by dragging/dropping while long tapping it.

You can specify the icons (apps) and their arrangement on the home screen or features and their order on lists displayed on job screens with an easy, intuitive operation. You can also hide the features you do not need.

Complete routine tasks with one touch

A desired colour, design, and name can be specified for an icon.

Your preferred features and settings can be registered to appear on the home screen as one-touch apps. Just tapping a one-touch app completes your routine task.

Support non-routine tasks with high flexibility

Settings like the N-up option and number of copies can be changed every time a preset is selected.

Saving the settings as a preset eliminates the trouble of specifying complicated settings each time. Every time the preset is selected, you can tailor the settings to the preferences at that time, which streamlines your work process.

Automated workflow

Automate scan processes for regular work tasks

Using the Scan Delivery* automates the process of scanning and saving documents to predefined destinations according to the rules specified for each task or document type, eliminating the need to manually specify file names or formats and perform OCR processing*. You can also extract characters from certain areas of a document and use them for the folder or file name.
*: Optional.

Easy to scan   Easy to use

① Scan   ② Auto-image correction   ③ Auto-sort & save   ④ Share / utilise

Use of QR codes and barcodes
The Scan Delivery scans a QR code or barcode printed in the header or body of a document and automatically processes it based on the scan results.
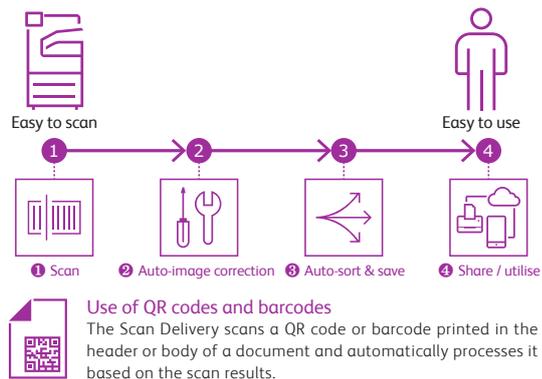

Fax settings that lead to reduced waste and higher efficiency

By configuring the Paperless Fax settings, you can store received faxes in folders so that only necessary faxes are printed after being checked on the control panel. Faxes can also be forwarded to your smartphone. With an optional kit, you can also sort them by fax number, received date, or person in charge and switch the behaviour of a multifunction device. With one touch, you can change the setting to forward incoming faxes by email, which allows you to check them from outside the office.

- Minimising paper output   • Checking incoming faxes outside the office
- Automatic sorting and forwarding
- Changing the behaviour of a multifunction device when a fax is received depending on the time of day

Incoming fax

Printed

Attached to an email so that the recipient can check the fax on a smartphone

Forwarded to a computer

Intelligent scanning

Simple scanning for workflows
Convert Scanned documents automatically to a pre-specified file format and destination. Once a file format and destination is registered, select the workflow button and scan the document. Add a file name by adding a document type and date to a user-defined string set on a PC, great for routine work. Efficiency in managing and utilising contracts and bills, etc. is dramatically increased.
Note: Optional.

Smoothly scanning of irregular sizes
Irregular and small size paper documents can be automatically adjusted to the closest standard size just by scanning with the duplex automatic document feeder. Easily scan receipts and order slips without entering each individual document size.

Irregular size document → Automatically scanned as standard size

Invoice $0000.00-
Receipt $0000.00-
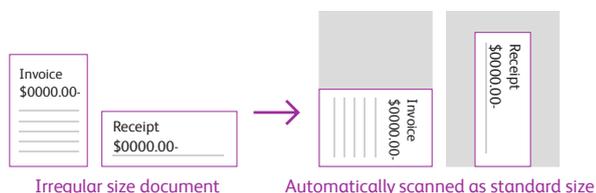

Various scan functions
Supporting a wide range of file formats and processes
Emailed or scanned data can be converted to TIFF, JPEG, DocuWorks or PDF formats. The device also offers OCR processing* enabling convenient searching. Data size can be compressed to reduce network load, and a password can also be set.
*: Optional.

Even easier personalised scanning
The "ScanAuto" function automatically selects the correct size/ simplex/duplex/orientation of your document, simply by pressing the start button. Also, when using the authentication function, your e-mail address is automatically set as the destination just by opening ScanAuto, eliminating the need to enter the destination.

Borderless workspace

With the ever evolving world of connectivity, FUJIFILM Business Innovation is continuously working towards helping our customers achieve a common vision of seamless workflow integration to overcome redundancies, reduce turnaround times and the flexibility of working anytime, anywhere.

Mobility

Near Field Communication (NFC)*
The FUJIFILM Business Innovation ApeosPort series offers NFC technology as a standard, for simplifying the print and scan process. Using NFC technology, a contactless communication can be established between a mobile and the multifunction device.
*: Passive Near Field Communication.

Wireless LAN Kit*
Adding Wireless LAN kit option, provides customer with a choice of further securing their print environment by providing separate printing options to their guests and employees respectively.
*: Optional.

Print Utility 📱
FUJIFILM Business Innovation Print Utility enables users to print directly from iOS or Android™ devices, putting mobile printing and scanning convenience at your fngertips. Print stored photo albums, web pages or shoot and print on the go from your iOS or Android™ device. Simply wave your NFC enabled mobile device on the multifunction device to automatically launch Print Utility and you are ready to print or scan.

Portable UI 📱
Your smartphone (iOS and Android™) can be used as a portable UI panel. Simply set a job on your smartphone and touch the NFC (near feld communication) reader of the multifunction device to perform basic operations such as copy, scan and fax (Store to Folder or E-mail).

Up to 30 favorites can be registered
Portable UI for Business enables up to 30 frequently used sets of settings to be registered as favorites. These settings can be recalled with a single touch. The destination for sending faxes or saving scanned data can also be registered for added convenience.

User friendly operations

User friendliness via light and sound
The device cleverly uses light and sound to notify the user of its state. A gentle sound is easily heard over offce noise, changing to correctly notify the user of a completed job. The center tray area is equipped with a sensor – a soft blue light fashes while printing and stays lit when printing is completed, signifying a job ready for collection. This reduces information leaks due to unretrieved printed documents.

Smart WelcomEyes
Sensors installed in the multifunction device detect an approaching user, automatically waking the device from sleep mode. This allows sleep mode to be engaged permanently for excellent energy saving – while ensuring that the device is ready to go, when you need it.

Document multi-feed detection
The Duplex Automatic Document Feeder (DADF) features an ultrasonic sensor that is capable of detecting overlapping documents feeding incorrectly, preventing scanning errors when copying or scanning multiple documents.
Note: Provided for C7070 / C6570 only.

Widely supporting various paper types
From postcards to long paper
The device supports a wide variety of sizes and weights, from envelopes, postcards to long documents up to a maximum of 320 x 1200 mm*[1], and from 52 to 300 gsm. Long printing*[2] feature gives the ability to print longer documents such as banners.

*1: Printable area is 305 x 1194 mm.
*2: Only supported by the PCL driver and the Adobe® PostScript® 3™ driver.

Retractable paper tray closed with a gentle push
Paper trays are equipped with a retracting mechanism that gently closes the tray without pushing it in all the way.

Further diversified

Bringing diversity to post-processing.

Staple
Stapling multiple pages together

Punch
Hole punching for binders

Saddle Staple
Convenient for making catalogs and booklets

Z-fold
Z-folds A3 documents into A4 size

Tri-fold
Convenient for inserting direct mail, etc.

	Optional	Wireless LAN (IEEE 802.11 a / b / g / n / ac)

*1 The speed may be reduced due to the image quality adjustment.
   The printing speed may be reduced depending on the document.
*2 Please refer to our official website for the latest supported OS.

Scan Function (Optional)

Item		Description
Type		Colour Scanner
Scan Resolution		600 x 600 dpi, 400 x 400 dpi, 300 x 300 dpi, 200 x 200 dpi
Scan Speed		Same as the Scan Speed for the Duplex Automatic Document Feeder
Interface	Standard	Ethernet 1000BASE-T / 100BASE-TX / 10BASE-T
	Optional	Wireless LAN (IEEE 802.11 a / b / g / n / ac)

Note: Installed for Model-CPS as standard.

Fax Function (Optional)

Item	Description
Original Size	Max: A3, 11 x 17", Long document (Longest 600 mm)
Recording Paper Size	Max: A3, 11 x 17"
	Min: A5
Transmission Time	2 seconds and more but fewer than 3 seconds*1
Transmission Mode	ITU-T G3
Applicable Lines	Telephone subscriber line, PBX, Fax communication (PSTN), Maximum 3 ports*2 (G3-3 ports)

*1 When A4 size document with approximately 700 characters is transmitted in standard image-quality (8 x 3.85 lines/mm) and in high-speed mode (28.8 kbps or faster, JBIG). Only indicates the time for transmitting the image information and does not include the communication control time. The total communication time will vary depending on the contents of the document, the type of machine receiving the fax, and line condition.
*2 No.of FAX lines is up to 3 ports. Port refers to number of channels for FAX.

		(1 pass, 2 sided scanning: B/W 270 ppm, Colour 270 ppm)	
		[Standard Document (A4 LEF), 200 dpi, to Folder]	

*1 The minimum custom size is 84 x 139.7 mm.
*2 64 gsm paper.
*3 The scanning speed varies depending on the documents.

HCF B1 (Optional)

Item	Description
Paper Size	A4 LEF, Letter LEF, JIS B5 LEF
Paper Weight	55 to 216 gsm
Feeding Capacity / Number of Tray*	2030 sheets x 1-tray
Dimensions	W 389 x D 610 x H 380 mm
Weight	29 kg

*80 gsm paper.

Envelope Tray (Optional)

Item	Description
Paper Size	DL LEF, ISO-C4, ISO-C5 LEF, ISO-C6 LEF, Commercial #10 LEF, Monarch7.3/4 LEF
	Custom Size: 241 x 372 mm to 90 x 98 mm
Paper Weight	Envelope: 75 to 90 gsm, Postcard: 106 to 220 gsm
Feeding Capacity / Number of Tray*	50 sheets x 1-tray
Dimensions	W 620 x D 566 x H 87 mm
Weight	3 kg

*Commercial #10 paper.

Side Tray

Item	Description
Paper Capacity*	100 sheets
Dimensions	W 324 x D 567 x H 228 mm

*64 gsm paper.

Finisher-A2 (Optional)

Item		Description
Type		Sort (Offset available[*1]) / Stack (Offset available[*1])
Paper Size		Max: A3, 11 x 17", Min: A5, Postcard (100 x 148 mm)
Paper Weight[*2]		52 to 256 gsm

*9 Inner connector within the body is excluded.

Folder Unit CD1 (Optional)

Item		Description
Z Fold Half Sheet	Paper Size	A3, 11 x 17", JIS B4
	Paper Weight	60 to 90 gsm
Tri-fold	Paper Size	A4, Letter
	Paper Weight	60 to 90 gsm
	Paper Capacity[*1]	40 sheets
Power Supply		AC220-240 V +/- 10 %, 0.6 A, 50/60 Hz common[*2]
Maximum Power Consumption		144 W (AC220-240 V +/- 10 %)
Dimensions		W 232 x D 726 x H 991 mm
Weight		53 kg

Note: Optional of C3 Finisher / C3 Finisher with Booklet Maker.
*1 64 gsm paper.
*2 Power supply separate from the main unit is required.

Notes

1) If the storage media (such as hard disk drives) of the base unit fail, loss of received data, accumulated data, registered setting data, etc. may occur. In no event shall the Company be liable for any damages whatsoever arising from loss of data.

2) Functional spare parts will be available for at least 7 years after the product is no longer manufactured.

For Your Safety
Before using the product, read the Instruction Manual carefully for proper use. Use the product with the power source and voltage specified. Be sure to establish ground connection. Otherwise, electronic shock may result in the case of a failure or short circuit.
