Various combinations

Model-CPS

With 3 Tray Module^{*1}

Quick, beautiful, and comfortable operation

Easy-to-use 7-inch touch panel

- Smartphone-like operation
- Adjustable UI panel angle for easy viewing
- Support for multiple languages^{*1}
- Comes standard with the NFC^{*2} touch area

Visual and sound notifications

- The device uses visual and sound to notify the user of its state. The sound changes depending on the purpose to correctly notify the user of the operation status.

Directly printing from or scanning to USB

- It is possible to print documents stored on a USB memory or save scanned data to the memory without using a computer.

High-speed copying/scanning of a large volume of documents

- Duplex Automatic Document Feeder that holds a maximum of 100 sheets^{*3}.

One touch multiple destination scanning

- Multi Send scan allows user to simultaneously perform Scan to PC (SMB/FTP/SFTP), Scan to e-mail and Store & Send Link functions.

2096 sheets paper capacity^{*3*4}

- Small but equipped with a tray that handles paper feed of 500 sheets, bypass tray that handles paper feed of 96 sheets as standard.
- Bypass tray that can perform Paper Size Detection and switch paper tray.

Uncompromising Image quality

- Achieved print that is eye-friendly and easy to scan by taking advantage of the low temperature fusing properties of EA-Eco LGK toner with lower glossiness.
- Image Enhancement processing reproduces diagonal lines and the outlines of characters, which can become jagged when printed, more smoothly.

Eco friendly

- LED print head achieves both high image quality and energy saving.
- Smart Energy Save allows you to reduce power consumption and CO₂ emissions by distributing power only to the features requested by users.
- Environmentally friendly inedible woody biomass plastic is used for some parts.

^{*1}: Japanese, English, Chinese (Simplified and Traditional), Korean, Thai, Vietnamese, and Indonesian. ^{*2}: Passive Near Field Communication.
^{*3}: 80 gsm paper. ^{*4}: When configured with Standard + 3 Tray Module.

Finisher-A2
-Staple

Finisher-B3, Booklet Maker Unit for Finisher-B3
-Staple -Punch^{*1} -Saddle Staple^{*2} -Single Fold^{*2}

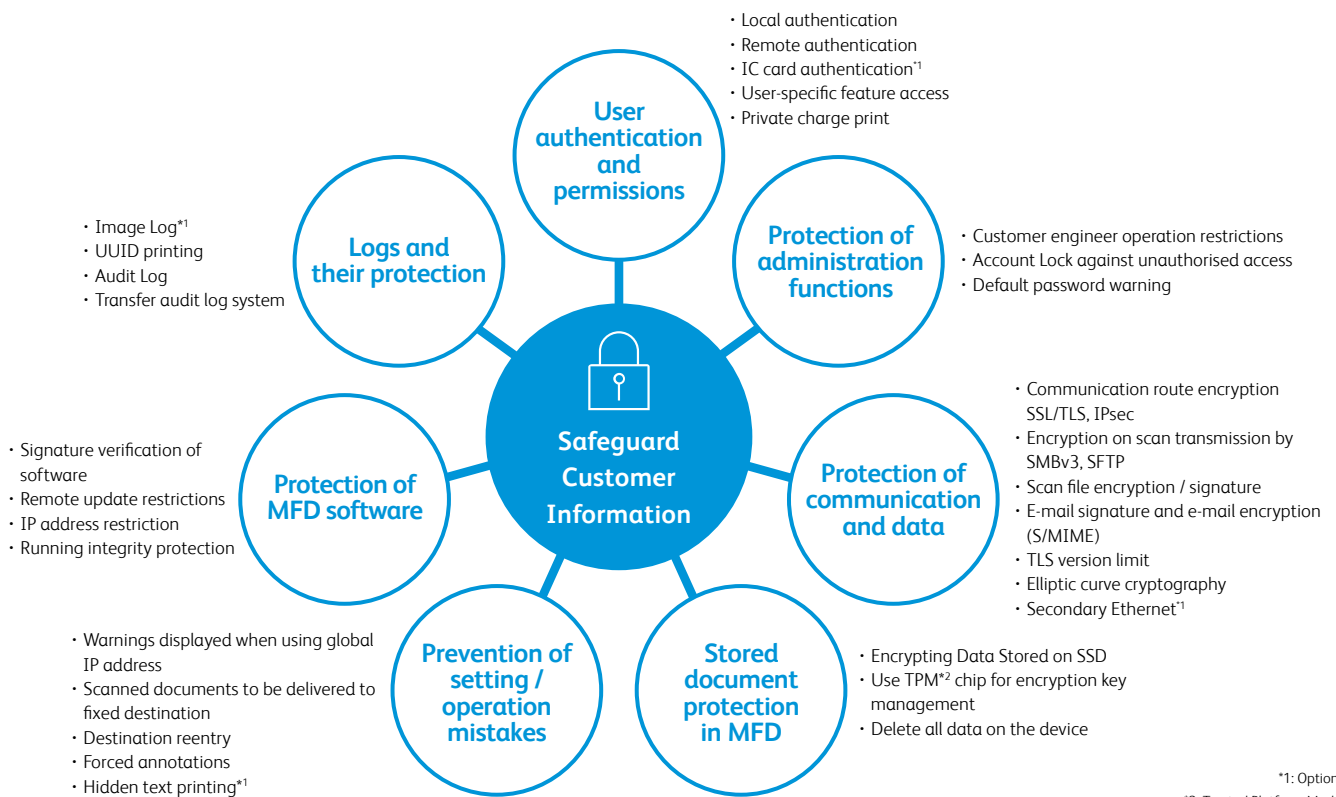

With Side Tray
Supports distribution output for each of copy, print, and fax jobs

^{*1}: Optional. ^{*2}: Booklet Maker Unit is required. Finisher-B3 makes a crease without folding when performing saddle stapling or single folding.

360° data security

ApeosPort is equipped with both user-friendliness and security measures

Comprehensive security measures protect your important information against threats such as unauthorised access, information leakage, and data tampering.

Azure Active Directory Authentication

The ApeosPort device can integrate with Microsoft Azure Active Directory, a cloud-based identity management service. Azure Active Directory can be used for authenticating to multifunction devices.

Server-less user authentication

The server-less authentication feature* makes an additional need of authentication server unnecessary. Associating user information registered to multifunction devices with the ID information of IC cards makes it possible to share the user information among all multifunction devices connected to a parent device, enabling server-less user authentication on the devices.

*: Optional.

End to end automated workflow

Easy preference setting for quicker operations

New ApeosPort similar to a smartphone can have shortcuts Apps for regular operations or settings. Ability to drag and drop these Apps as per individual user preference provides much needed simplicity and easiness in operations.

Custom home screen and feature list

Move an icon just by dragging/dropping while long tapping it.

You can specify the icons (apps) and their arrangement on the home screen or features and their order on lists displayed on job screens with an easy, intuitive operation. You can also hide the features you do not need.

Complete routine tasks with one touch

A desired colour, design, and name can be specified for an icon.

Fax to Company XX
Registering a recipient prevents misdirected faxes.

Scan application forms
The trouble of specifying a file format or storage destination each time is eliminated.

Your preferred features and settings can be registered to appear on the home screen as one-touch apps. Just tapping a one-touch app completes your routine task.

Support non-routine tasks with high flexibility

Settings like the N-up option and number of copies can be changed every time a preset is selected.

Saving the settings as a preset eliminates the trouble of specifying complicated settings each time. Every time the preset is selected, you can tailor the settings to the preferences at that time, which streamlines your work process.

Copy an ID card on one side of a sheet

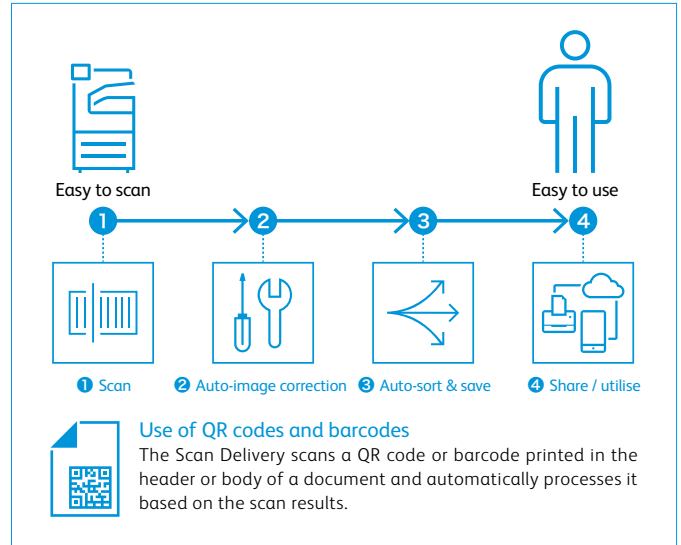

With the ID Card Copy feature, both sides of an ID card, such as a driver's licence card or health insurance card, can be printed aligned with each other on one side of a sheet. You can also enlarge the images to get a better view of them.

Automated scan processes for regular work tasks

Using the Scan Delivery* automates the process of scanning and saving documents to predefined destinations according to the rules specified for each task or document type, eliminating the need to manually specify file names or formats and perform OCR processing*. You can also extract characters from certain areas of a document and use them for the folder or file name.

*: Optional.

Automated scan processes for individual users

ScanAuto makes it possible to automatically optimise scan settings depending on the document orientation, sides to scan, etc. When the Authentication feature is used, the destination is automatically set to the authenticated user's address.

Fax settings that lead to reduced waste and higher efficiency

By configuring the Paperless Fax settings, you can store received faxes in folders so that only necessary faxes are printed after being checked on the control panel. Faxes can also be forwarded to your smartphone. With an optional kit, you can also sort them by fax number, received date, or person in charge and switch the behaviour of a multifunction device. With one touch, you can change the setting to forward incoming faxes by email, which allows you to check them from outside the office.

- Minimising paper output
- Checking incoming faxes outside the office
- Automatic sorting and forwarding
- Changing the behaviour of a multifunction device when a fax is received depending on the time of day

Borderless workspace

Your smartphone is now a control panel

Using Portable UI for Business* allows you to perform copy, fax, or scan function on new ApeosPort device directly with an iOS or Android™ smartphone. Users are simply set the job parameters on the smartphone itself and start the job just by holding the smartphone near the NFC** touch area, largely reducing the wait time while queuing at the device.

Note: A wireless communication network connected to an access point is required.

*: Can be downloaded from Google Play™ or AppStore for free.

**: Passive Near Field Communication

Wireless operations

With wireless capability, the ApeosPort device can be installed anywhere in your office. The devices accept print or scan jobs sent from laptops or smartphones¹, realising more flexible working. Supported wireless printing features include Print Utility, AirPrint, and Mopria® Print Service.

Print Utility*²

This app enables a user to start a print or scan job just by holding a smartphone over the NFC³ touch area, saving the trouble of specifying from which multifunction device a document is to be printed or scanned.

*1: Available only when the multifunction device is connected to a Wi-Fi network.

*2: Can be downloaded from Google Play™ or AppStore for free.

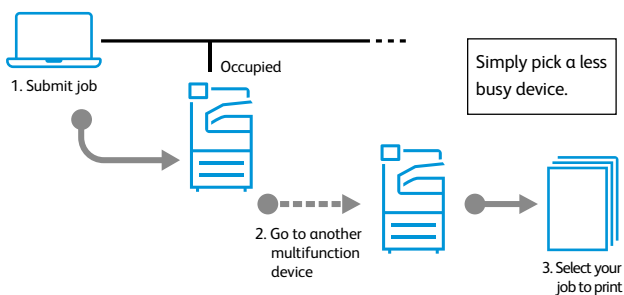

*3: Passive Near Field Communication.

No need to queue up for printing

Server-less On-Demand Print* allows you to release a print job from a multifunction device other than the one specified when the job was submitted if the device is being used by another person, eliminating the need to wait for your turn.

*: Optional.
